

“Tetra Pak have put an increased focus on safety in the past few years and we are driving significant improvements”.

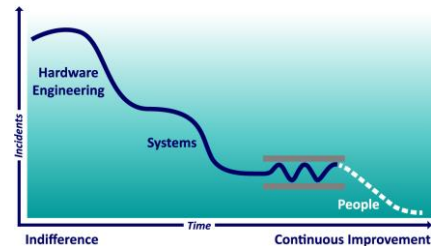

The client

Tetra Pak is a multinational food packaging and processing company of Swedish origin with head offices in Lund, Sweden, and Lausanne, Switzerland. The company has over 23,000 employees worldwide and offers packaging, filling machines and processing for dairy, beverages, cheese, ice-cream and prepared food, including distribution tools like accumulators, cap applicators, conveyors, crate packers, film wrappers, line controllers and straw applicators

Their challenge

The challenge is to deliver a sustainable and measurable process and training which will drive improvements in safety culture and safety performance across the supply chain organisation.

“We had implemented BBS across the factories, but this was not supported well enough centrally to ensure that it was implemented in a consistent manner and due to this improvements were not easily tracked.”

How they are succeeding - Engagement with RyderMarsh OCAID

Although (in 2016) we are still in the implementation phase, and this will take 2 years to cover all the SCO factories, I am confident that the “train-the-internal-consultant” program that we have designed and delivered with the expertise of RyderMarsh OCAID, will deliver on our expectations.

Outcomes

I am confident that the train the internal consultant program that we have designed and delivered with the expertise of RyderMarsh OCAID, will deliver on our expectations.

Stuart Gunn

Corporate Manager Occupational Health & Safety

Footnote: in 2019 we are discussing how we build on the success of the above program by taking the concept further and wider.
